SUMMARY

Frontend Engineer with **1.5+ years** of combined experience (internship & full-time) building responsive and scalable web applications. Currently the **sole frontend engineer** at a product-based startup, independently driving architecture, performance optimization, and feature delivery across enterprise-grade products.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS, Java, Python, SQL
Libraries/Frameworks: Next.js, React.js, Tailwind CSS, ShadCN UI, Redux, Node.js, Express.js
Tools & Technologies: Figma, Git, MongoDB, Firebase, REST API, JWT, Vite, Yarn, Multer, Linux

EXPERIENCE

Frontend Engineer **Oct 2025 - Present**
PrudentBit *Noida, On-site*

- Sole frontend engineer for **ImmuneFiles & ImmuneShare** - enterprise secure file-sharing products featuring IP-based access restrictions, password protection, time-limited links, and proctored sharing.
- Engineered **client-side direct-to-Azure Blob Storage** uploads via SAS token generation, bypassing the Django backend for file transfer, cutting server bandwidth by ~64% and improving upload speed for large PDFs and videos.
- Moved proctored-sharing **person & device detection** from server to client-side by replacing CocoSSD with **EfficientDet-Lite0** eliminating round-trip latency, reducing inference costs, and improving real-time accuracy.
- Built **custom keyword-based redaction** from scratch and added granular redaction controls, letting users define exactly which words or phrases to hide from sensitive documents.

Frontend Developer Intern **Jan 2025 - Jul 2025**
VDOIT Technologies *Gurugram, On-site*

- Developed **25+** responsive and reusable React components, converting Figma designs into pixel-perfect interfaces across multiple web pages.
- Integrated **RESTful APIs**, managed global state with Redux, and debugged **40+** UI/functional bugs, significantly improving user experience & performance.
- Collaborated with designers & backend engineers to implement scalable UI architecture and improve component reusability.

Web Developer Intern **Oct 2023 - Apr 2024**
TechiEco Solutions *Gurugram, Hybrid*

- Utilized **ReactJS, Firebase** to develop a website to introduce new users to TechiEco's products and features.
- Led and managed** a 6-member dev team in a startup environment, ensuring timely feature delivery and fostering a collaborative workflow.
- Contributed directly to the development process through coding, demonstrating both technical expertise and leadership capabilities.

PROJECTS

CareerPlus - Full-Stack Job Portal | *MongoDB, Express, React.js, Node.js, Redux, Multer*

- Built a full-stack **MERN job portal** with **JWT authentication, role-based access**, and protected routes for job seekers and employers.
- Developed **RESTful APIs** for user, job, company, and application management using **Express.js** and integrated with **MongoDB Atlas**.
- Developed the frontend using **React.js, Tailwind CSS**, and **ShadCN UI**, enhancing UX with **Framer Motion** animations.
- Implemented **Redux Toolkit** for global **state management** and developed **custom React hooks** for dynamic job filtering and search.
- Added **file upload support** (e.g., resumes, profile pictures) via **Multer** and developed an **admin dashboard** to manage jobs, companies, and applicants.
- Source Code** [Live Link](#)

EDUCATION

Bachelor of Technology in Computer Science and Engineering
Sushant University, Gurugram

2021 - 2025
CGPA: 8.5
